

Proven Engineered Products - Complete Material Handling Solutions

## Link-Belt® and Syntron® Today: July 2017

### Screening Feeders and Screens

When you need to scalp, separate, size, de-dust, or de-water bulk products, you need Syntron® Screen Feeders.

They're powered by highly efficient electromagnetic drives that provide gentle handling and minimal product degradation. No moving parts means no lubrication required. Sizes range from tiny 3-inch wide pill de-dusters to huge four-foot wide feeders for coal processing. **Screen Feeders and Vibrating Screens.**

### Case Study: Underground Inclined Coal Handling Conveyors

ASGCO® Manufacturing took on a major project at a coal fired power plant. The existing older feeder was clogging and not producing enough product flow to supply the operation. ASGCO engineers provided a way to restore and control material flow from an above ground surge to the underground conveyor belt that feeds the power plant using an XPMF-200 Syntron Direct Drive Electromechanical Feeder with VFD controller. Here's how. **Coal Handling Case Study.**

### SYNTRO-FLO Loading Feeder

The SYNTRO-FLO Cone Crusher Loading Feeder is featured in *Aggregates and Mining Today*. Find out more about this Two-

### Syntron Material Handling University

The Syntron University training session for Distributors and Manufacturer's Reps in August is already full. But there's more. Reserve your space now for the training session October 24-26, 2017 or January 30-February 1, 2018. Attendance is limited to the first 25 people. Email **Sheena Woodruff.**

### New Manufacturer's Rep

Join us in welcoming **Southwest Drives and Systems.** Their team has over 100 years of experience servicing the industrial market with drives and power transmission products. They now represent the Syntron® Screw Conveyors and Bucket Elevators in NM, OK, TX, AK, and LA.

### Now Find Us on Instagram

Keep up to date with industry news, product information,

Mass Tuned Direct Drive Vibratory Feeder. It features an engineered discharge designed for equal distribution of coarse and fine product to the crusher. Dig into the details of how to increase rock production and lower operating costs. [SYNTRO-FLO Loading Feeder](#).

## New Website: Easy to Use Contact Us

The new Syntron Material Handling website is filled with new functions, including an expanded Reference Library and Frequently Asked Questions. Don't miss the new Contact Us section. If you need to speak to someone, the Contact Us page makes it easy to find an Application Engineer or Sales Rep, based on the product line and region. Try it out at <http://syntronmh.com/contact-us>.
