

SyntroFlo Cone Crusher Feeder by **Syntron**®

Increase your ROI by as much as 40%

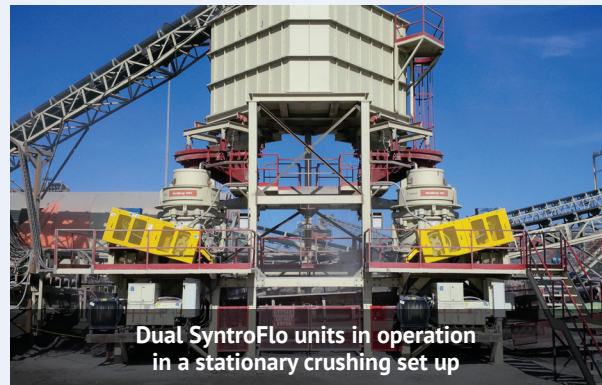

A typical 500 HP Cone Crusher will achieve increases in the amount of net finished product it crushes by as much as 40% when automated and fed by a SyntroFlo cone crusher loading feeder.

At an average of \$9.75/ton of 3/8" minus rock, an additional 100 tons/hr of net finished product will return an additional \$975 per hour in rock production

**Adaptable to your crushing operation needs,
whether mobile or stationary**

SyntroFlo installed on a
mobile crushing operation

Dual SyntroFlo units in operation
in a stationary crushing set up

**SyntroFlo will get you more production,
better finished products, and lower maintenance cost**

Loaded with Features

- Only one piece of equipment required
- More consistent amp draw on your crusher
- Longer life for crusher wear components
- Higher crusher productivity
- Reduced downtime
- Reduced maintenance cost for the crusher
- Improved fracture ratio of the finished product
- Extended equipment life cycle
- Expedited ROI
